

**B.Sc.,  
COMPUTER SCIENCE**

**SYLLABUS**

**FROM THE ACADEMIC YEAR  
2023 - 2024**

**TAMILNADU STATE COUNCIL FOR HIGHER  
EDUCATION, CHENNAI – 600 005**

# 1. Introduction

## **B.Sc. Computer Science**

Education is the key to development of any society. Role of higher education is crucial for securing right kind of employment and also to pursue further studies in best available world class institutes elsewhere within and outside India. Quality education in general and higher education in particular deserves high priority to enable the young and future generation of students to acquire skill, training and knowledge in order to enhance their thinking, creativity, comprehension and application abilities and prepare them to compete, succeed and excel globally. Learning Outcomes-based Curriculum Framework (LOCF) which makes it student-centric, interactive and outcome-oriented with well-defined aims, objectives and goals to achieve. LOCF also aims at ensuring uniform education standard and content delivery across the state which will help the students to ensure similar quality of education irrespective of the institute and location.

Computer Science is the study of quantity, structure, space and change, focusing on problem solving, application development with wider scope of application in science, engineering, technology, social sciences etc. throughout the world in last couple of decades and it has carved out a space for itself like any other disciplines of basic science and engineering. Computer science is a discipline that spans theory and practice and it requires thinking both in abstract terms and in concrete terms. Nowadays, practically everyone is a computer user, and many people are even computer programmers. Computer Science can be seen on a higher level, as a science of problem solving and problem solving requires precision, creativity, and careful reasoning. The ever-evolving discipline of computer science also has strong connections to other disciplines. Many problems in science, engineering, health care, business, and other areas can be solved effectively with computers, but finding a solution requires both computer science expertise and knowledge of the particular application domain. Computer science has a wide range of specialties. These include Computer Architecture, Software Systems, Graphics, Artificial Intelligence, Computational Science, and Software Engineering. Drawing from a common core of computer science knowledge, each specialty area focuses on specific challenges. Computer Science is practiced by mathematicians, scientists and engineers. Mathematics, the origins of Computer Science, provides reason and logic. Science provides the methodology for learning and refinement. Engineering provides the techniques for building hardware and software.

Programme Outcome, Programme Specific Outcome and Course Outcome

Computer Science is the study of quantity, structure, space and change, focusing on problem solving, application development with wider scope of application in science, engineering, technology, social sciences etc. The key core areas of study in Mathematics include Algebra, Analysis (Real & Complex), Differential Equations, Geometry, and Mechanics. The

Students completing this programme will be able to present Software application clearly and precisely, make abstract ideas precise by formulating them in the Computer languages. Completion of this programme will also enable the learners to join teaching profession, enhance their employability for government jobs, jobs in software industry, banking, insurance and investment sectors, data analyst jobs and jobs in various other public and private enterprises.

## **2. Programme Outcomes (PO) of B.Sc. degree programme in Computer Science**

- Scientific aptitude will be developed in Students
- Students will acquire basic Practical skills & Technical knowledge along with domain knowledge of different subjects in the Computer Science & humanities stream.
- Students will become employable; Students will be eligible for career opportunities in education field, Industry, or will be able to opt for entrepreneurship.
- Students will possess basic subject knowledge required for higher studies, professional and applied courses.
- Students will be aware of and able to develop solution oriented approach towards various Social and Environmental issues.
- Ability to acquire in-depth knowledge of several branches of Computer Science and aligned areas. This Programme helps learners in building a solid foundation for higher studies in Computer Science and applications.
- The skills and knowledge gained leads to proficiency in analytical reasoning, which can be utilized in modelling and solving real life problems.
- Utilize computer programming skills to solve theoretical and applied problems by critical understanding, analysis and synthesis.
- To recognize patterns and to identify essential and relevant aspects of problems.
- Ability to share ideas and insights while seeking and benefitting from knowledge and insight of others.
- Mould the students into responsible citizens in a rapidly changing interdependent society.

The above expectations generally can be pooled into 6 broad categories and can be modified according to institutional requirements:

PO1: Knowledge

PO2: Problem Analysis

PO3: Design / Development of Solutions

PO4: Conduct investigations of complex problems

PO5: Modern tool usage

PO6: Applying to society

### **3. Programme Specific Outcomes of B.Sc. Degree Programme in Computer Science**

PSO1: Think in a critical and logical based manner

PSO2: Familiarize the students with suitable software tools of computer science and industrial applications to handle issues and solve problems in mathematics or statistics and realtime application related sciences.

PSO3: Know when there is a need for information, to be able to identify, locate, evaluate, and effectively use that information for the issue or problem at hand.

PSO4: Understand, formulate, develop programming model with logical approaches to a  
Address issues arising in social science, business and other contexts.

PSO5: Acquire good knowledge and understanding to solve specific theoretical and applied

problems in advanced areas of Computer science and Industrial statistics.

PSO6: Provide students/learners sufficient knowledge and skills enabling them to undertake

further studies in Computer Science or Applications or Information Technology and its allied areas on multiple disciplines linked with Computer Science.

PSO7: Equip with Computer science technical ability, problem solving skills, creative talent

and power of communication necessary for various forms of employment.

PSO8: Develop a range of generic skills helpful in employment, internships& societal activities.

PSO9: Get adequate exposure to global and local concerns that provides platform for further exploration into multi-dimensional aspects of computing sciences.

Mapping of Course Learning Outcomes (CLOs) with Programme Outcomes (POs) and Programme Specific Outcomes (PSOs) can be carried out accordingly, assigning the appropriate level in the grids: (put tick mark in each row)

| PO/PSO | PSO1 | PSO2 | PSO3 | PSO4 | PSO5 | PSO6 |
|--------|------|------|------|------|------|------|
| PO1    | ✓    |      |      |      |      |      |
| PO2    |      | ✓    |      |      |      |      |
| PO3    |      |      | ✓    |      |      |      |
| PO4    |      |      |      | ✓    |      |      |

| PO6    |      |      |      |      |      | ✓    |

#### 4. Highlights of the Revamped Curriculum

- Student-centric, meeting the demands of industry & society, incorporating industrial components, hands-on training, skill enhancement modules, industrial project, project with viva-voce, exposure to entrepreneurial skills, training for competitive examinations, sustaining the quality of the core components and incorporating application oriented content wherever required.
- The Core subjects include latest developments in the education and scientific front, advanced programming packages allied with the discipline topics, practical training, devising mathematical models and algorithms for providing solutions to industry / real life situations. The curriculum also facilitates peer learning with advanced mathematical topics in the final semester, catering to the needs of stakeholders with research aptitude.
- The General Studies and Computer Science based problem solving skills are included as mandatory components in the ‘Training for Competitive Examinations’ course at the final semester, a first of its kind.
- The curriculum is designed so as to strengthen the Industry-Academia interface and provide more job opportunities for the students.
- The Industrial Statistics course is newly introduced in the fourth semester, to expose the students to real life problems and train the students on designing a mathematical model to provide solutions to the industrial problems.

- The Internship during the second year vacation will help the students gain valuable work experience that connects classroom knowledge to real world experience and to narrow down and focus on the career path.
- Project with viva-voce component in the fifth semester enables the student, application of conceptual knowledge to practical situations. The state of art technologies in conducting a Explain in a scientific and systematic way and arriving at a precise solution is ensured. Such innovative provisions of the industrial training, project and internships will give students an edge over the counterparts in the job market.
- State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and inter disciplinary nature are incorporated as Elective courses, covering conventional topics to the latest – Statistics with R Programming, Data Science, Machine learning. Internet of Things and Artificial Intelligence etc..

## 5. Value additions in the Revamped Curriculum:

| Semester        | Newly introduced Components   | Outcome / Benefits  |
|-----------------|---|---|
| I               | <p><b>Foundation Course</b></p> <p>To ease the transition of learning from higher secondary to higher education, providing an overview of the pedagogy of learning abstract Mathematics and simulating mathematical concepts to real world.</p> | <ul style="list-style-type: none"> <li>• Instil confidence among students</li> <li>• Create interest for the subject</li> </ul>   |
| I, II, III, IV  | <p><b>Skill Enhancement papers</b> (Discipline centric / Generic / Entrepreneurial)</p>   | <ul style="list-style-type: none"> <li>• Industry ready graduates</li> <li>• Skilled human resource</li> <li>• Students are equipped with essential skills to make them employable</li> <li>• Training on Computing / Computational skills enable the students gain knowledge and exposure on latest computational aspects</li> <li>• Data analytical skills will enable students gain internships, apprenticeships, field work involving data collection, compilation, analysis etc.</li> <li>• Entrepreneurial skill training will provide an opportunity for independent livelihood</li> <li>• Generates self – employment</li> <li>• Create small scale entrepreneurs</li> <li>• Training to girls leads to women empowerment</li> <li>• Discipline centric skill will improve the Technical knowhow of solving real life problems using ICT tools</li> </ul> |
| III, IV, V & VI | <p>Elective papers-</p> <p>An open choice of topics categorized under Generic and Discipline Centric</p>  | <ul style="list-style-type: none"> <li>• Strengthening the domain knowledge</li> <li>• Introducing the stakeholders to the State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and inter disciplinary nature</li> <li>• Students are exposed to Latest</li> </ul>  |

|   |   |   |
|---|---|---|
|   |   | <p>topics on Computer Science / IT, that require strong mathematical background</p> <ul style="list-style-type: none"> <li>Emerging topics in higher education / industry / communication network / health sector etc. are introduced with hands-on-training, facilitates designing of mathematical models in the respective sectors</li> </ul>   |
| <b>IV</b>   | Industrial Statistics                             | <ul style="list-style-type: none"> <li>Exposure to industry moulds students into solution providers</li> <li>Generates Industry ready graduates</li> <li>Employment opportunities enhanced</li> </ul>   |
| <b>II year Vacation activity</b>                                | Internship / Industrial Training                  | <ul style="list-style-type: none"> <li>Practical training at the Industry/ Banking Sector / Private/ Public sector organizations / Educational institutions, enable the students gain professional experience and also become responsible citizens.</li> </ul>  |
| <b>V Semester</b>   | Project with Viva – voce                          | <ul style="list-style-type: none"> <li>Self-learning is enhanced</li> <li>Application of the concept to real situation is conceived resulting in tangible outcome</li> </ul>  |
| <b>VI Semester</b>  | Introduction of Professional Competency component | <ul style="list-style-type: none"> <li>Curriculum design accommodates all category of learners; ‘Mathematics for Advanced Explain’ component will comprise of advanced topics in Mathematics and allied fields, for those in the peer group / aspiring researchers;</li> <li>‘Training for Competitive Examinations’ –caters to the needs of the aspirants towards most sought - after services of the nation viz, UPSC, CDS, NDA, Banking Services, CAT, TNPSC group services, etc.</li> </ul> |
| <b>Extra Credits:<br/>For Advanced Learners / Honors degree</b> |   | <ul style="list-style-type: none"> <li>To cater to the needs of peer learners / research aspirants</li> </ul>   |

|   |   |
|---|---|
| <b>Skills acquired from the Courses</b> | Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill |
|---|---|

- TOL-Tamil/Other Languages,
- E – English
- CC - Core course –Core competency, critical thinking, analytical reasoning, research skill &teamwork
- Generic Elective(Allied)
- SEC-Skill Enhancement Course - Exposure beyond the discipline (Value Education ,Entrepreneurship Course, Computer application for Science, etc.,
- FC-Foundation Course
- DSE-Discipline Specific Elective
- T/P- T-Theory, P-Practical

**Chairperson details:** Mrs.R.Indra, Government Arts College for Women, Sivagangai.Mobile No: 9442722566

## CORE COURSE 1

| Subject Code              | Subject Name  | Category | L | T | P | S | Credits | Inst. Hours | Marks |          |       |
|---------------------------|---|----------|---|---|---|---|---------|-------------|-------|----------|-------|
|                           |   |          |   |   |   |   |         |             | CIA   | External | Total |
| <b>23BCE1C1</b>           | <b>PROGRAMMING IN C</b>   | Core -I  | 5 | - | - | - | 5       | 5           | 25    | 75       | 100   |
| <b>Learning Objective</b> |   |          |   |   |   |   |         |             |       |          |       |
| LO1                       | To familiarize the students with the Programming basics and the fundamentals of C, Datatypes in C, Mathematical and logical operations.   |          |   |   |   |   |         |             |       |          |       |
| LO2                       | To understand the concept using if statements and loops   |          |   |   |   |   |         |             |       |          |       |
| LO3                       | This unit covers the concept of Arrays  |          |   |   |   |   |         |             |       |          |       |
| LO4                       | This unit covers the concept of Functions, Structures and unions  |          |   |   |   |   |         |             |       |          |       |
| LO5                       | To understand the concept of implementing pointers and Files.   |          |   |   |   |   |         |             |       |          |       |
| <b>Contents</b>           |   |          |   |   |   |   |         |             |       |          |       |
| <b>UNIT I</b>             | Overview of C: History of C – Importance of C – Basic Structure of C Programs – Programming Style – Character Set – C Tokens – Keywords and Identifiers – Constants, Variables and Data Types – Declaration of Variables – Defining Symbolic Constants – Declaring a variable as a constant – overflow and underflow of data – Operators and Expressions: Arithmetic, relational, logical, assignment operators – increment and decrement operators, conditional operators, bitwise operators, special operators – Arithmetic Expressions- Evaluation of Expressions – Precedence of Arithmetic Operators – Type Conversions in Expressions – Operator Precedence and Associativity Mathematical functions. |          |   |   |   |   |         |             |       |          |       |
| <b>UNIT II</b>            | Managing I/O Operations: Reading and Writing a Character – Formatted Input, Output – Decision Making & Branching: if statement - if else statement - nesting of if else statements - else if ladder – switch statement – the ?: operator – goto statement – the while statement – do statement – the for statement – jumps in loops.  |          |   |   |   |   |         |             |       |          |       |
| <b>UNIT III</b>           | Arrays: One-Dimensional Arrays – Declaration, Initialization – Two-Dimensional Arrays – Multi-dimensional Arrays – Dynamic Arrays – Initialization. Strings: Declaration, Initialization of string variables – reading and writing strings – string handling functions  |          |   |   |   |   |         |             |       |          |       |
| <b>UNIT IV</b>            | User-defined functions: need – multi-function programs – elements of user defined functions – definition – return values and their types – function calls, declaration, category – all types of arguments and return values – nesting of functions – recursion – passing arrays, strings to functions – scope visibility and life time of variables. Structures and Unions: Defining a structure – declaring a structure variable – accessing structure members – initialization – copying and comparing – operation on individual members – array of structures – arrays within structures – structures within structures – structures and functions – unions – size of structures – bit fields.           |          |   |   |   |   |         |             |       |          |       |
| <b>UNIT V</b>             | <b>Pointers:</b> the address of a variable – declaring, initialization of pointer variables – accessing a variable through its pointer – chain of pointers – pointer increments and scale factors – pointers and character strings – pointers as function arguments – pointers and structures. <b>Files:</b> Defining, opening, closing a file – IO Operations on files – Error handling during IO operations – command line arguments.   |          |   |   |   |   |         |             |       |          |       |

| Course Outcomes        |   | Programme Outcome |
|------------------------|---|-------------------|
| CO                     | On completion of this course, students will   |                   |
| CO1                    | Remember the program structure of C with its syntax and semantics   | PO1,PO3,PO5       |
| CO2                    | Understand the programming principles in C (data types, operators, branching and looping, arrays, functions, structures, pointers and files)  | PO2,PO3,PO6       |
| CO3                    | Apply the programming principles learnt in real-time problems   | PO3,PO4,PO5       |
| CO4                    | Analyze the various methods of solving a problem and choose the best method   | PO4,PO5,PO6       |
| CO5                    | Code, debug and test the programs with appropriate test cases   | PO5,PO6           |
| <b>Text Book</b>       |   |                   |
| 1                      | E.Balagurusamy , 2012, <i>Programming in ANSI C</i> , 6th Edition, Tata McGraw Hill Publishing Company.<br>UNIT I: Chapters 1 (Except 1.3-1.7, 1.10-1.12), 2 (Except 2.9, 2.13), 3 (Except 3.13)<br>UNIT II: Chapters 4 – 6<br>UNIT III: Chapters 7, 8 (Except 8.5, 8.6, 8.7, 8.9, 8.10)<br>UNIT IV: Chapters 9 (Except 9.20), 10<br>UNIT V: Chapters 11 (Except 11.8, 11.10, 11.12, 11.14, 11.15, 11.17), 12 (Except 12.6) |                   |
| <b>Reference Books</b> |   |                   |
| 1.                     | Byron Gottfried, Schaum’s Outline Programming with C, Fourth Edition, Tata McGraw-Hill, 2018.   |                   |

## CORE PRACTICAL

| Subject Code            | Subject Name   | Category          | L | T | P | S | Credits | Inst. Hours              | Marks |          |       |  |
|-------------------------|--|-------------------|---|---|---|---|---------|--------------------------|-------|----------|-------|--|
|                         |  |                   |   |   |   |   |         |                          | CIA   | External | Total |  |
| 23BCE1P1                | PROGRAMMING IN C LAB   | Core Practical -I | - | - | 3 | - | 3       | 4                        | 25    | 75       | 100   |  |
| <b>Course Objective</b> |  |                   |   |   |   |   |         |                          |       |          |       |  |
| LO1                     | To familiarize the students with the Programming basics and the fundamentals of C, Datatypes in C, Mathematical and logical operations.  |                   |   |   |   |   |         |                          |       |          |       |  |
| LO2                     | To understand the concept using if statements and loops  |                   |   |   |   |   |         |                          |       |          |       |  |
| LO3                     | This unit covers the concept of Arrays and Functions   |                   |   |   |   |   |         |                          |       |          |       |  |
| LO4                     | This unit covers the concept of Structures and unions and Preprocessors  |                   |   |   |   |   |         |                          |       |          |       |  |
| LO5                     | To understand the concept of implementing pointers and files   |                   |   |   |   |   |         |                          |       |          |       |  |
| Group A                 | <b>List of Exercises</b>   |                   |   |   |   |   |         |                          |       |          |       |  |
|                         | <ol style="list-style-type: none"> <li>1. Write a C Program to find the sum of digits.</li> <li>2. Write a C Program to check whether a given number is Armstrong or not.</li> <li>3. Write a C Program to check whether a given number is Prime or not.</li> <li>4. Write a C Program to generate the Fibonacci series.</li> <li>5. Write a C Program to display the given number is Adam number or not.</li> <li>6. Write a C Program to print reverse of the given number and string.</li> <li>7. Write a C Program to find minimum and maximum of 'n' numbers using array.</li> <li>8. Write a C Program to arrange the given number in ascending order.</li> <li>9. Write a C Program to add and multiply two matrices.</li> <li>10. Write a C Program to calculate NCR and NPR.</li> </ol>   |                   |   |   |   |   |         |                          |       |          |       |  |
| Group B                 | <ol style="list-style-type: none"> <li>1. Write a C Program to find the grade of a student using else if ladder.</li> <li>2. Write a C Program to implement the various string handling function.</li> <li>3. Write a C Program to create an integer file and displaying the even numbers only.</li> <li>4. Write a C Program to calculate quadratic equation using switch-case.</li> <li>5. Write a C Program to count number of characters, words and lines in a text file.</li> <li>6. Write a C Program to generate student mark list using array of structures.</li> <li>7. Write a C Program to create and process the student mark list using file</li> <li>8. Write a C Program to create and process pay bill using file</li> <li>9. Write a C Program to create and process inventory control using file</li> <li>10. Write a C Program to create and process electricity bill using file</li> </ol> |                   |   |   |   |   |         |                          |       |          |       |  |
|                         | <b>Course Outcomes</b>   |                   |   |   |   |   |         | <b>Programme Outcome</b> |       |          |       |  |
| CO                      | On completion of this course, students will  |                   |   |   |   |   |         |                          |       |          |       |  |
| 1                       | Remember the program structure of C with its syntax and semantics  |                   |   |   |   |   |         | PO1,PO3,PO5              |       |          |       |  |
| 2                       | Understand the programming principles in C (data   |                   |   |   |   |   |         | PO2,PO3,PO6              |       |          |       |  |

|                        |   |             |
|------------------------|---|-------------|
|                        | types, operators, branching and looping, arrays, functions, structures, pointers and files)                               |             |
| 3                      | Apply the programming principles learnt in real-time problems   | PO3,PO4     |
| 4                      | Analyze the various methods of solving a problem and choose the best method   | PO4,PO5,PO6 |
| 5                      | Code, debug and test the programs with appropriate test cases   | PO4,PO6     |

| <b>Learning Objectives</b> |   |          |   |   |   |   |         |             |                           |          |       |
| LO1                        | Familiarize with writing of algorithms, fundamentals of C and philosophy of problem solving.  |          |   |   |   |   |         |             |                           |          |       |
| LO2                        | Implement different programming constructs and decomposition of problems into functions.  |          |   |   |   |   |         |             |                           |          |       |
| LO3                        | Use data flow diagram, Pseudo code to implement solutions.  |          |   |   |   |   |         |             |                           |          |       |
| LO4                        | Define and use of arrays with simple applications   |          |   |   |   |   |         |             |                           |          |       |
| LO5                        | Understand about operating system and their uses  |          |   |   |   |   |         |             |                           |          |       |
| <b>Contents</b>            |   |          |   |   |   |   |         |             |                           |          |       |
| <b>UNIT I</b>              | <p><b>Introduction:</b> History, characteristics and limitations of Computer. Hardware/Anatomy of Computer: CPU, Memory, Secondary storage devices, Input Devices and Output devices. Types of Computers: PC, Workstation, Minicomputer, Main frame and Supercomputer. Software: System software and Application software. <b>Programming Languages:</b> Machine language, Assembly language, High-level language, 4GL and 5GL-Features of good programming language. Translators: Interpreters and Compilers.</p>  |          |   |   |   |   |         |             |                           |          |       |
| <b>UNIT II</b>             | <p><b>Data:</b> Data types, Input, Processing of data, Arithmetic Operators, Hierarchy of operations and Output. Different phases in Program Development Cycle (PDC). <b>Structured Programming: Algorithm:</b> Features of good algorithm, Benefits and drawbacks of algorithm. <b>Flowcharts:</b> Advantages and limitations of flowcharts, when to use flowcharts, flowchart symbols and types of flowcharts. <b>Pseudocode:</b> Writing a pseudocode. Coding, documenting and testing a program: Comment lines and types of errors. <b>Program design:</b> Modular Programming.</p> |          |   |   |   |   |         |             |                           |          |       |
| <b>UNIT III</b>            | <p><b>Selection Structures:</b> Relational and Logical Operators -Selecting from Several Alternatives – Applications of Selection Structures. <b>Repetition Structures:</b> Counter Controlled Loops –Nested Loops– Applications of Repetition Structures.</p>  |          |   |   |   |   |         |             |                           |          |       |
| <b>UNIT IV</b>             | <p><b>Data:</b> Numeric Data and Character Based Data. <b>Arrays:</b> One Dimensional Array - Two Dimensional Arrays – Strings as Arrays of Characters.</p>   |          |   |   |   |   |         |             |                           |          |       |
| <b>UNIT V</b>              | <p><b>Data Flow Diagrams:</b> Definition, DFD symbols and types of DFDs. <b>Program Modules:</b> Subprograms-Value and Reference parameters- Scope of a variable - Functions – Recursion. <b>Files:</b> File Basics-Creating and reading a sequential file- Modifying Sequential Files.</p>   |          |   |   |   |   |         |             |                           |          |       |
| <b>Course Outcomes</b>     |   |          |   |   |   |   |         |             | <b>Programme Outcomes</b> |          |       |
| CO                         | On completion of this course, students will   |          |   |   |   |   |         |             |                           |          |       |

|                      |   |                                 |
|----------------------|---|---------------------------------|
| CO1                  | Study the basic knowledge of Computers.<br>Analyze the programming languages.   | PO1, PO2, PO3,<br>PO4, PO5, PO6 |
| CO2                  | Study the data types and arithmetic operations.<br>Know about the algorithms.<br>Develop program using flow chart and pseudocode.   | PO1, PO2, PO3,<br>PO4, PO5, PO6 |
| CO3                  | Determine the various operators.<br>Explain about the structures.<br>Illustrate the concept of Loops  | PO1, PO2, PO3,<br>PO4, PO5, PO6 |
| CO4                  | Study about Numeric data and character-based data.<br>Analyze about Arrays.   | PO1, PO2, PO3,<br>PO4, PO5, PO6 |
| CO5                  | Explain about DFD<br>Illustrate program modules.<br>Creating and reading Files  | PO1, PO2, PO3,<br>PO4, PO5, PO6 |

| 23BCE2C1                  | <b>OBJECT ORIENTED PROGRAMMING CONCEPTS USING C++</b>   | Core-III | 5 | - | - | - | 4                        | 5           | 25    | 75                  | 100   |
| <b>Learning Objective</b> |   |          |   |   |   |   |                          |             |       |                     |       |
| LO1                       | Describe the procedural and object oriented paradigm with concepts of streams, classes, functions, data and objects   |          |   |   |   |   |                          |             |       |                     |       |
| LO2                       | Understand dynamic memory management techniques using pointers, constructors, destructors, etc  |          |   |   |   |   |                          |             |       |                     |       |
| LO3                       | Describe the concept of function overloading, operator overloading, virtual functions and polymorphism  |          |   |   |   |   |                          |             |       |                     |       |
| LO4                       | Classify inheritance with the understanding of early and late binding, usage of exception handling, generic programming   |          |   |   |   |   |                          |             |       |                     |       |
| LO5                       | Demonstrate the use of various OOPs concepts with the help of programs  |          |   |   |   |   |                          |             |       |                     |       |
|                           | <b>Contents</b>   |          |   |   |   |   |                          |             |       | <b>No. of Hours</b> |       |
| <b>UNIT I</b>             | Introduction to C++ - key concepts of Object-Oriented Programming – Advantages – Object Oriented Languages – I/O in C++ - C++ Declarations. Control Structures : - Decision Making and Statements : If ..else, jump, goto, break, continue, Switch case statements - Loops in C++ :for, while, do - functions in C++ - inline functions – Function Overloading. |          |   |   |   |   |                          |             |       | 15                  |       |
| <b>UNIT II</b>            | Classes and Objects: Declaring Objects – Defining Member Functions – Static Member variables and functions – array of objects –friend functions – Overloading member functions – Bit fields and classes – Constructor and destructor with static members.   |          |   |   |   |   |                          |             |       | 15                  |       |
| <b>UNIT III</b>           | Operator Overloading: Overloading unary, binary operators – Overloading Friend functions –type conversion – Inheritance: Types of Inheritance – Single, Multilevel, Multiple, Hierarchal, Hybrid, Multi path inheritance – Virtual base Classes – Abstract Classes.   |          |   |   |   |   |                          |             |       | 15                  |       |
| <b>UNIT IV</b>            | Pointers – Declaration – Pointer to Class , Object – this pointer – Pointers to derived classes and Base classes – Arrays – Characteristics – array of classes – Memory models – new and delete operators – dynamic object – Binding, Polymorphism and Virtual Functions.   |          |   |   |   |   |                          |             |       | 15                  |       |
| <b>UNIT V</b>             | Files – File stream classes – file modes – Sequential Read / Write operations – Binary and ASCII Files – Random Access Operation – Templates – Exception Handling - String – Declaring and Initializing string objects – String Attributes – Miscellaneous functions.   |          |   |   |   |   |                          |             |       | 15                  |       |
|                           | <b>Total</b>  |          |   |   |   |   |                          |             |       | <b>75</b>           |       |
| <b>Course Outcomes</b>    |   |          |   |   |   |   | <b>Programme Outcome</b> |             |       |                     |       |
| CO                        | Upon completion of the course the students would be able to:  |          |   |   |   |   |                          |             |       |                     |       |
| 1                         | Remember the program structure of C with its syntax and   |          |   |   |   |   | PO1,PO6                  |             |       |                     |       |

|                        |   |          |
|------------------------|---|----------|
|                        | semantics   |          |
| 2                      | Understand the programming principles in C (data types, operators, branching and looping, arrays, functions, structures, pointers and files)      | PO2      |
| 3                      | Apply the programming principles learnt in real-time problems   | PO4 ,PO5 |
| 4                      | Analyze the various methods of solving a problem and choose the best method   | PO6      |
| 5                      | Code, debug and test the programs with appropriate test cases   | PO3,PO6  |
| <b>Text Book</b>       |   |          |

| C2                      | Understand dynamic memory management techniques using pointers, constructors, destructors, etc                          |                   |   |   |   |   |                          |             |       |          |              |
| C3                      | Describe the concept of function overloading, operator overloading, virtual functions and polymorphism                  |                   |   |   |   |   |                          |             |       |          |              |
| C4                      | Classify inheritance with the understanding of early and late binding, usage of exception handling, generic programming |                   |   |   |   |   |                          |             |       |          |              |
| C5                      | Demonstrate the use of various OOPs concepts with the help of programs  |                   |   |   |   |   |                          |             |       |          |              |
| S.No                    | List of Exercises   |                   |   |   |   |   |                          |             |       |          | No. of Hours |
| 1                       | Write a C++ program to demonstrate function overloading, Default Arguments and Inlinefunction.                          |                   |   |   |   |   |                          |             |       |          | 60           |
| 2                       | Write a C++ program to demonstrate Class and Objects  |                   |   |   |   |   |                          |             |       |          |              |
| 3                       | Write a C++ program to demonstrate the concept of Passing Objects to Functions  |                   |   |   |   |   |                          |             |       |          |              |
| 4                       | Write a C++ program to demonstrate the Friend Functions.  |                   |   |   |   |   |                          |             |       |          |              |
| 5                       | Write a C++ program to demonstrate the use of "this" pointer.   |                   |   |   |   |   |                          |             |       |          |              |
| 6                       | Write a C++ program to demonstrate Constructor and Destructor   |                   |   |   |   |   |                          |             |       |          |              |
| 7                       | Write a C++ program to demonstrate Unary Operator Overloading   |                   |   |   |   |   |                          |             |       |          |              |
| 8                       | Write a C++ program to demonstrate Binary Operator Overloading  |                   |   |   |   |   |                          |             |       |          |              |
| 9                       | Write a C++ program to demonstrate Single Inheritance   |                   |   |   |   |   |                          |             |       |          |              |
| 10                      | Write a C++ program to demonstrate Multilevel Inheritance   |                   |   |   |   |   |                          |             |       |          |              |
| 11                      | Write a C++ program to demonstrate Multiple Inheritance   |                   |   |   |   |   |                          |             |       |          |              |
| 12                      | Write a C++ program to demonstrate Hierarchical Inheritance   |                   |   |   |   |   |                          |             |       |          |              |
| 13                      | Write a C++ program for Hybrid Inheritance  |                   |   |   |   |   |                          |             |       |          |              |
| 14                      | Write a C++ program to demonstrate Virtual Functions.   |                   |   |   |   |   |                          |             |       |          |              |
| 15                      | Write a C++ program to manipulate a Text File.  |                   |   |   |   |   |                          |             |       |          |              |
| 16                      | Write a C++ program to perform Sequential I/O Operations on a file.   |                   |   |   |   |   |                          |             |       |          |              |
| 17                      | Write a C++ program to find the Biggest Number using Command Line Arguments   |                   |   |   |   |   |                          |             |       |          |              |
| 18                      | Write a C++ program to demonstrate Class Template   |                   |   |   |   |   |                          |             |       |          |              |
| 19                      | Write a C++ program to demonstrate Function Template.   |                   |   |   |   |   |                          |             |       |          |              |
| 20                      | Write a C++ program to demonstrate Exception Handling.  |                   |   |   |   |   |                          |             |       |          |              |
| <b>Course Outcomes</b>  |   |                   |   |   |   |   | <b>Programme Outcome</b> |             |       |          |              |
| CO                      | Upon completion of the course the students would be able to:  |                   |   |   |   |   |                          |             |       |          |              |
| 1                       | Remember the program structure of C with its syntax and semantics   |                   |   |   |   |   | PO4,PO5                  |             |       |          |              |

|                        |   |          |
|------------------------|---|----------|
| 2                      | Understand the programming principles in C (data types, operators, branching and looping, arrays, functions, structures, pointers and files)      | PO6      |
| 3                      | Apply the programming principles learnt in real-time problems   | PO4 ,PO5 |
| 4                      | Analyze the various methods of solving a problem and choose the best method   | PO6      |
| 5                      | Code, debug and test the programs with appropriate test cases   | PO4,PO5  |

| <b>UNIT I</b>              | Introduction: Basic Terminology - Classification of Data Structures - Operations on Data Structures - Abstract Data Type – Algorithms - Time and Space Complexity - Asymptotic Notation. Arrays: Introduction to Array - Declaration of Arrays - Accessing the Elements of an Array - Operations on Arrays - Sparse Matrices – Application of Arrays.  |          |   |   |   |   |                            |             |           | 15                      |       |
| <b>UNIT II</b>             | Linked List: Introduction Basic Terminologies - Singly Linked Lists - Circular Linked Lists - Doubly Linked Lists - Circular Doubly Linked Lists - Applications of Linked Lists  |          |   |   |   |   |                            |             |           | 15                      |       |
| <b>UNIT III</b>            | Stack: Introduction to Stacks - Array Representation of Stacks - Operations on a Stack - Linked Representation of Stacks -Operations on a Linked Stack - Applications of Stacks. Queues: Introduction to ueues - Array Representation of Queues - Linked Representation of Queues - Types of Queues - Applications of Queues.  |          |   |   |   |   |                            |             |           | 15                      |       |
| <b>UNIT IV</b>             | Trees: Introduction - Types of Trees - Creating a Binary Tree from a General Tree - Traversing a Binary Tree - Huffman’s Tree - Applications of Trees. Efficient Binary Trees: Binary Search Trees - Operations on Binary Search Trees: Searching for a Node in a Binary Search Tree - Inserting a New Node in a Binary Search Tree - Deleting a Node from a Binary Search Tree - Threaded Binary Trees - AVL Trees. Heaps: Binary Heaps - Applications of Heaps. Graphs: Introduction - Graph Terminology - Representation of Graphs - Graph Traversal Algorithms |          |   |   |   |   |                            |             |           | 15                      |       |
| <b>UNIT V</b>              | Searching: Introduction to Searching - Linear Search - Binary Search<br>Sorting: Introduction to Sorting - Bubble Sort - Insertion Sort - Selection Sort - Merge Sort - Quick Sort - Radix Sort - Heap Sort - Shell Sort -Tree Sort - Comparison of Sorting Algorithms - External Sorting  |          |   |   |   |   |                            |             |           | 15                      |       |
|                            | <b>Total</b>   |          |   |   |   |   |                            |             |           | <b>75</b>               |       |
| <b>Course Outcomes</b>     |  |          |   |   |   |   | <b>Programmeme Outcome</b> |             |           |                         |       |
| CO                         | On completion of this course, students will  |          |   |   |   |   |                            |             |           |                         |       |

| <b>Learning Objectives</b> |  |           |   |   |   |   |         |             |       |                     |       |
| LO1                        | To provide fundamental knowledge of object-oriented programming  |           |   |   |   |   |         |             |       |                     |       |
| LO2                        | To equip the student with programming knowledge in Core Java from the basics up.   |           |   |   |   |   |         |             |       |                     |       |
| LO3                        | To enable the students to use AWT controls, Event Handling and Swing for GUI.  |           |   |   |   |   |         |             |       |                     |       |
| LO4                        | To provide fundamental knowledge of object-oriented programming.   |           |   |   |   |   |         |             |       |                     |       |
| LO5                        | To equip the student with programming knowledge in Core Java from the basics up.   |           |   |   |   |   |         |             |       |                     |       |
| <b>Contents</b>            |  |           |   |   |   |   |         |             |       | <b>No. of Hours</b> |       |
| <b>UNIT I</b>              | <b>Introduction:</b> Review of Object Oriented concepts – History of Java – Java buzzwords – JVM architecture – Data types - Variables - Scope and life time of variables - arrays - operators – control statements - type conversion and casting - simple java program - constructors - methods - Static block - Static Data – Static Method String and String Buffer Classes.  |           |   |   |   |   |         |             |       | 12                  |       |
| <b>UNIT II</b>             | <b>Inheritance:</b> Basic concepts - Types of inheritance - Member access rules - Usage of this and Super key word - Method Overloading - Method overriding - Abstract classes - Dynamic method dispatch - Usage of final keyword. <b>Packages:</b> Definition – Access Protection – Importing Packages. <b>Interfaces:</b> Definition – Implementation – Extending Interfaces. <b>Exception Handling:</b> <i>try – catch- throw - throws – finally</i> – Built-inexceptions - Creating own Exception classes. |           |   |   |   |   |         |             |       | 12                  |       |
| <b>UNIT III</b>            | <b>Multithreaded Programming:</b> Thread Class - Runnable interface – Synchronization–Using synchronized methods– Using synchronized statement- Inter thread Communication –Deadlock.<br><b>I/O Streams:</b> Concepts of streams - Stream classes- Byte and Character stream - Reading console Input and Writing Console output - File Handling.   |           |   |   |   |   |         |             |       | 12                  |       |
| <b>UNIT IV</b>             | <b>AWT Controls:</b> The AWT class hierarchy - user interface components- Labels - Button - Text Components - Check Box - Check Box Group - Choice - List Box - Panels – Scroll Pane - Menu - Scroll Bar. Working with Frame class - Colour - Fonts and layout managers. <b>Event Handling:</b> Events - Event sources - Event Listeners - Event Delegation Model (EDM) - Handling Mouse and Keyboard Events - Adapter classes - Inner classes   |           |   |   |   |   |         |             |       | 12                  |       |
| <b>UNIT V</b>              | <b>Swing:</b> Introduction to Swing - Hierarchy of swing components. Containers - Top level containers - JFrame - JWindow - JDialog - JPanel - JButton - JToggleButton - JCheckBox - JRadioButton - JLabel, JtextField - JTextArea - JList - JComboBox - JScrollPane.  |           |   |   |   |   |         |             |       | 12                  |       |
| <b>Total</b>               |  |           |   |   |   |   |         |             |       | <b>60</b>           |       |
| <b>Course Outcomes</b>     |  |           |   |   |   |   |         |             |       |                     |       |
| <b>Course Outcomes</b>     | On completion of this course, students will;   |           |   |   |   |   |         |             |       |                     |       |

|                      |   |               |
|----------------------|---|---------------|
| <b>CO1</b>           | Understand the basic Object-oriented concepts. Implement the basic constructs of Core Java.                             | PO1, PO2, PO6 |
| <b>CO2</b>           | Implement inheritance, packages, interfaces and exception handling of Core Java.  | PO2, PO3, PO8 |
| <b>CO3</b>           | Implement multi-threading and I/O Streams of Core Java  | PO1, PO3, PO5 |
| <b>CO4</b>           | Implement AWT and Event handling.   | PO2, PO6      |
| <b>CO5</b>           | Use Swing to create GUI.  | PO1, PO3, PO6 |

| 1                          | Write a Java program that prompts the user for an integer and then prints out all the prime numbers up to that Integer   |                   |   |   |   |   |         |       |       |          |                    |
| 2                          | Write a Java program to multiply two given matrices.   |                   |   |   |   |   |         |       |       |          |                    |
| 3                          | Write a Java program that displays the number of characters, lines and words in a text   |                   |   |   |   |   |         |       |       |          |                    |
| 4                          | Generate random numbers between two given limits using Random class and print messages according to the range of the value generated.  |                   |   |   |   |   |         |       |       |          |                    |
| 5                          | Write a program to do String Manipulation using CharacterArray and perform the following string operations:<br>a. String length<br>b. Finding a character at a particular position<br>c. Concatenating two strings   |                   |   |   |   |   |         |       |       |          |                    |
| 6                          | Write a program to perform the following string operations using String class:<br>a. String Concatenation<br>b. Search a substring<br>c. To extract substring from given string  |                   |   |   |   |   |         |       |       |          |                    |
| 7                          | Write a program to perform string operations using String Buffer class:<br>a. Length of a string<br>b. Reverse a string<br>c. Delete a substring from the given string   |                   |   |   |   |   |         |       |       |          |                    |
| 8                          | Write a java program that implements a multi-thread application that has three threads. First thread generates random integer every 1 second and if the value is even, second thread computes the square of the number and prints. If the value is odd, the third thread will print the value of cube of the number. |                   |   |   |   |   |         |       |       |          |                    |
| 9                          | Write a threading program which uses the same method asynchronously to print the numbers 1to10 using Thread1 and to print 90 to100 using Thread2.  |                   |   |   |   |   |         |       |       |          |                    |
| 10                         | Write a program to demonstrate the use of following exceptions.<br>a. Arithmetic Exception<br>b. Number Format Exception<br>c. ArrayIndexOutOfBoundsException<br>d. NegativeArraySizeException   |                   |   |   |   |   |         |       |       |          |                    |
| 11                         | Write a Java program that reads on file name from the user, then displays information about whether the file exists, whether the file is readable,   |                   |   |   |   |   |         |       |       |          |                    |

|                        |   |                          |
|------------------------|---|--------------------------|
|                        | whether the file is writable, the type of file and the length of the file in bytes  | 60                       |
| 12                     | Write a program to accept a text and change its size and font. Include bold italic options. Use frames and controls.  |                          |
| 13                     | Write a Java program that handles all mouse events and shows the event name at the center of the window when a mouse event is fired. (Use adapter classes).   |                          |
| 14                     | Write a Java program that works as a simple calculator. Use a grid layout to arrange buttons for the digits and for the +, -, *, % operations. Add a text field to display the result. Handle any possible exceptions like divide by zero.  |                          |
| 15                     | Write a Java program that simulates a traffic light. The program lets the user select one of three lights: red, yellow, or green with radio buttons. On selecting a button, an appropriate message with “stop” or “ready” or “go” should appear above the buttons in a selected color. Initially there is no message shown. |                          |
| <b>Total</b>           |   | <b>60</b>                |
| <b>Course Outcomes</b> |   | <b>Programme Outcome</b> |

| <b>LO1</b>                 | To know Basic Knowledge of Computer and its functions   |          |   |   |   |   |         |             |                     |          |       |
| <b>LO2</b>                 | Understanding the design of the Operating System  |          |   |   |   |   |         |             |                     |          |       |
| <b>LO3</b>                 | Imparting knowledge on CPU scheduling   |          |   |   |   |   |         |             |                     |          |       |
| <b>LO4</b>                 | Understanding the concepts of Process and Memory Management.  |          |   |   |   |   |         |             |                     |          |       |
| <b>LO5</b>                 | To code specialized programs for managing overall resources and operations of the computer.   |          |   |   |   |   |         |             |                     |          |       |
| <b>Contents</b>            |   |          |   |   |   |   |         |             | <b>No. of Hours</b> |          |       |
| <b>UNIT I</b>              | <p><b>Introduction:</b> operating system, history (1990s to 2000 and beyond), distributed computing, parallel computation.</p> <p><b>Process concepts:</b> definition of process, process states-Life cycle of a process, process management- process state transitions, process control block(PCB), process operations , suspend and resume, context switching, Interrupts -Interrupt processing, interrupt classes, Inter process communication-signals, message passing.</p>                 |          |   |   |   |   |         |             | 15                  |          |       |
| <b>UNIT II</b>             | <p><b>Asynchronous concurrent processes:</b> mutual exclusion-critical section, mutual exclusion primitives, implementing mutual exclusion primitives, Peterson’s algorithm,software solutions to the mutual Exclusion Problem-, n-thread mutual exclusion- Lamports Bakery Algorithm. Semaphores – Mutual exclusion with Semaphores, thread synchronization with semaphores, counting semaphores, implementing semaphores.</p> <p><b>Concurrent programming:</b> monitors, message passing</p> |          |   |   |   |   |         |             | 15                  |          |       |
| <b>UNIT III</b>            | <p><b>Deadlock and indefinite postponement:</b> Resource concepts, four necessary conditions for deadlock, deadlock prevention, deadlock avoidance and Dijkstra’s Banker’s algorithm, deadlock detection, deadlock recovery</p>   |          |   |   |   |   |         |             | 15                  |          |       |
| <b>UNIT IV</b>             | <p><b>Job and processor scheduling:</b> scheduling levels, scheduling objectives, scheduling criteria, preemptive vs non-preemptive scheduling, interval timer or interrupting clock, priorities, scheduling algorithms- FIFO scheduling, RR scheduling, quantum size, SJF scheduling, SRT scheduling, HRN scheduling, multilevel feedback queues, Fair share scheduling</p>  |          |   |   |   |   |         |             | 15                  |          |       |
| <b>UNIT V</b>              | <p><b>Real Memory organization and Management::</b> Memory organization, Memory management, Memory hierarchy, Memory management strategies, contiguous vs non-contiguous memory allocation, single user contiguous memory allocation, fixed partition multiprogramming, variable partition multiprogramming, Memory swapping</p> <p><b>Virtual Memory organization:</b> virtual memory basic concepts, multilevel storage organization,</p>   |          |   |   |   |   |         |             | 15                  |          |       |

|                        |  |                         |
|------------------------|--|-------------------------|
|                        | block mapping, paging basic concepts, segmentation, paging/segmentation systems.   |                         |
|                        | <b>Total</b>   | <b>75</b>               |
| <b>Course Outcomes</b> |  | <b>Program Outcomes</b> |
| <b>CO</b>              | On completion of this course, students will  |                         |
| <b>CO1</b>             | Define the fundamentals of OS and identify the concepts relevant to process , process life cycle, Scheduling Algorithms, Deadlock and Memory management          | PO1                     |
| <b>CO2</b>             | know the critical analysis of process involving various algorithms, an exposure to threads and semaphores  | PO1, PO2                |
| <b>CO3</b>             | Have a complete study about Deadlock and its impact over OS. Knowledge of handling Deadlock with respective algorithms and measures to retrieve from deadlock. . | PO4, PO6                |
| <b>CO4</b>             | Have complete knowledge of Scheduling Algorithms and its types.  | PO4, PO5,<br>PO6        |
| <b>CO5</b>             | understand memory organization and management  | PO3, PO8                |

| 1.                            | <p>1. Create a student table with the following attributes name, register number, department, marks in 5 subjects and total.</p> <p>(a) Insert few records into student table.</p> <p>(b) Display all the records</p> <p>(c) Calculate the total marks for all the records.</p> <p>(d) Display the information of student name, register number and total only.</p> <p>2. Create a student table with the following attributes name, register number, department, marks in 5 subjects and total.</p> <p>(a) Insert few records into student table.</p> <p>(b) Modify the name of the student as vignesh whose register number is 211278019.</p> <p>(c) Delete the records whose register number is 211278005.</p> <p>(d) Display all the records.</p> <p>3. Create a table student with name, roll number, gender, age and mobile number. Apply the following integrity rules to the student table</p> <p>(a) The student name must be in capital letter.</p> <p>(b) The roll number must be greater than zero.</p> <p>(c) The age cannot be a null value.</p> <p>(d) The gender must be "Male" or "Female" or "Transgend"</p> <p>(e) The mobile number may contain null values.</p> <p>4. Create a table student_master with the following attributes name, regno, dept and year of joining with suitable data types. Use Select command to do the following.</p> <p>(a) Display all the column in the student_master table .</p> <p>(b) Display the student's name column only.</p> <p>(c) Eliminate the duplicate entry in student_mastertable.</p> <p>(d) Select the details of student who is studying computer science department</p> <p>(e) Sort the attribute name in alphabetical order.</p> |                  |   |   |   |   |         |             |       |          | 75           |

5. Create a table `sales_order_details` with the `s_order_no` as primary key and it contains the following fields: `product_no`, `description`, `qty_ordered`, `qty_disp`, `product_rate`, `profit_percent`, `sell_price`, `supplier_name`. Use Select command to do the following
- Select each row and compute `sell_price*.50` and `sell_price*1.50` for each row selected.
  - Select `product_no`, `profit_percent`, `Sell_price` where `profit_per` is not between 10 and 20 both inclusive.
  - Select `product_no`, `description`, `profit_percent`, `sell_price` where `profit_percent` is not between 20 and 30.
  - Select the `suppliername` and `product_no` where `suppliername` has 'r' or 'h' as second character.
6. Create an Employee table with the following attributes: `employee_number`, `name`, `job` and `manager_id`. Set the `manager_id` as a foreign key for creating self referential structure.
- Insert few records
  - Display all the records
  - Display the employee details who are working under particular `manager_id`.
7. Create an Employee table with the following attributes: `employee_number`, `employee_name`, `department_number`, `job` and `salary`.
- Query to display the `employee_name` and `Salary` of all the employees earning more than 20000 INR.
  - Query to display `employee_name` and `department_number` for the particular `employee_number`.
  - Query to display `employee_name` and `Salary` for all employees whose salary is not in the range of INR 15000 and INR 30000.
8. Create an Employee table with the following attribute `employee_number`, `employee_name`, `job_type`, `hire_date`, `department_number` and `salary`.
- Query to display `employee_name` and `department_number` of all the employees in `department_number` 10 and `Department number` 20 in the alphabetical order by name.
  - Query to display `Name` of all the employees where the third letter of their name is =A.
  - Query to display `Name` with the 1<sup>st</sup> letter capitalized and all other letter lowercase
  - Query to display `Name` of all employees either have two R's or have two A's in their `Name`.
9. Create an Employee table with the following attributes: `employee_number`, `name`, `job`, `hire_date` and `manager_id`. Set the `manager_id` as a foreign key for creating self-referential structure.
- Query to display `name` and `Hire Date` of every Employee who was hired in 2007.
  - Query to display `name` and calculate the number of months between today and the date each employee was hired.
  - Query to display `name` and `job` of all employees who don't have a current `Manager`.
10. Create a table `sales_order` with `s_order_no`, `client_number`, `delivery_address`, `delivery_date` and `order_status`. Define the `s_order_no`

as primary key using column level Constraints.

(a) Create another table named as sales\_order\_copy with the same structure of sales\_order table. Define the s\_order\_no as primary key using table level constraints.

(b) Add a new column for storing salesman\_number in sales\_order using ALTER Command.

(c) Modify the size of delivery\_address in sales\_order table using ALTER command.

(d) Display the structure of sales\_order table

11. Create an Employee table with the following attribute employee\_number, employee\_name, job\_type, hire\_date, department\_number, salary and commission.

(a) Query to display the Highest, Lowest, Sum and Average Salaries of all the Employees

(b) Query to display the employee\_number and employee\_name for all employees who earn more than the average salary.

(c) Query to display the employee\_name, salary and commission for all the employees who earn commission.

(d) Sort the data in descending order of salary and commission

(e) Query to display employee\_name, salary and commission for all employees whose commission is greater than their salary increased by 5%.

12. Create a DEPARTMENT table with the attributes of department\_number and department\_name. Set the department\_number as a primary key.

(a) Insert few records

(b) Display all the records

(c) Create an employee table with the following attribute employee\_number, employee\_name, job and department\_number. Set the employee\_number as a primary key and set the department\_number as a foreign key.

(d) Query to display the employee details who are working in the particular department\_number.

(e) Query to display employee\_number, employee\_name and job from the employee table

(f) Query to display unique jobs from the employee Table

(g) Query to display the employee\_name concatenated by a job separated by a comma.

13. Create a DEPARTMENT table with the attributes of department\_number and department\_name. Set the department number as a primary key.

(a) Create an Employee table with the following attributes: employee\_number, name, job\_type, department\_number and location.

(b) Query to display Unique Listing of all Jobs that are in department\_number 20.

(c) Query to display employee name, department\_name and department\_number for all the employees.

(d) Query to display name, Job, department\_number and department\_name for all the employees working at the Mumbai

|    |  |                           |
|----|--|---------------------------|
|    | <p>location.</p> <p>14. Create a table client-master with the following fields: client_no, name, address, city, state, pincode, remarks, bal_due with suitable data types.</p> <p>(a) Create another table supplier_master from client_master.</p> <p>(b) rename the attribute client_no with supplier_no and the attribute <b>name</b> with supplier_name in the supplier_master table</p> <p>(c) Insert data into client_master</p> <p>(d) Insert data into supplier_master from client_master.</p> <p>(e) Delete the row which is having the value chennai in the city attribute of client_master table.</p> <p>(f) Drop the client_master table</p> <p>15. Create a table master_book to contain the information of magazine_code, magazine_name and publisher, magazine_type (Weekly/biweekly/monthly) and price. Write a PL/SQL block to perform insert, update and delete operations on the above table</p> <p>16. Create a table to contain phone_number, user_name, address of the phone user. Write a function to search for an address using phone numbers.</p> <p>17. Create a table to store the salary details of the employees in a company. Declare the cursor to contain employee_number, employee_name and net_salary. Use cursor to update the employee salaries.</p> <p>18. Create a table to contain the information about the voters in a particular constituency. Write a proper trigger to update or delete a row in the table.</p> <p>19. Create a table employee to contain the information of employee_name, employee_number and salary.</p> <p>(a) Write a procedure to increase 10% of salary to all employees (procedure without argument).</p> <p>(b) Write a procedure to increase specific percentage for specific department number (procedure with argument).</p> |                           |

|                            | <b>Contents</b>  |           |   |   |   |   |         |             | <b>Course Objectives</b> |          |       |
| <b>UNIT I</b>              | <p><b>Introduction:</b> The software engineering discipline, programs vs. software products, why study software engineering, emergence of software engineering, Notable changes in software development practices, computer systems engineering.</p> <p><b>Software Life Cycle Models:</b> Why use a life cycle model, Classical waterfall model, iterative waterfall model, prototyping model, evolutionary model, spiral model, comparison of different life cycle models.</p>                     |           |   |   |   |   |         |             | 15                       |          |       |
| <b>UNIT II</b>             | <p><b>Requirements Analysis and Specification:</b> Requirements gathering and analysis, Software requirements specification (SRS)</p> <p><b>Software Design:</b> Good software design, cohesion and coupling, neat arrangement, software design approaches, object- oriented vs function-oriented design</p>   |           |   |   |   |   |         |             | 15                       |          |       |
| <b>UNIT III</b>            | <p><b>Function-Oriented Software Design:</b> Overview of SA/SD methodology, structured analysis, data flow diagrams (DFD's), structured design, detailed design.<b>User-Interface design:</b> Characteristics of a good interface; basic concepts; types of user interfaces; component based GUI development, a user interface methodology.</p>  |           |   |   |   |   |         |             | 15                       |          |       |
| <b>UNIT IV</b>             | <p><b>Coding and Testing:</b> Coding; code review; testing; testing in the large vs testing in the small; unit testing; black-box testing; white-box testing; debugging; program analysis tools; integration testing; system testing; some general issues associated with testing.<b>Software Reliability and Quality Management:</b> Software reliability; statistical testing; software quality; software quality management system; SEI capability maturity model; personal software process.</p> |           |   |   |   |   |         |             | 15                       |          |       |
| <b>UNIT V</b>              | <p><b>Computer Aided Software Engineering:</b> CASE and its scope; CASE environment; CASE support in software life cycle; other characteristics of CASE tools; towards second generation CASE tool; architecture of a CASE environment.</p> <p><b>Software Maintenance:</b> Characteristic of software maintenance; software reverse engineering; software maintenance process models; estimation of maintenance cost.</p>   |           |   |   |   |   |         |             | 15                       |          |       |

|                         |  |               |

| <b>Course Outcomes</b>  |  |               |
| <b>Course Outcomes</b>  | On completion of this course, students will;   |               |
| <b>CO1</b>              | Gain basic knowledge of analysis and design of systems   | PO1           |
| <b>CO2</b>              | Ability to apply software engineering principles and techniques  | PO1, PO2      |
| <b>CO3</b>              | Model a reliable and cost-effective software system  | PO4, PO6      |
| <b>CO4</b>              | Ability to design an effective model of the system   | PO4, PO5, PO6 |
| <b>CO5</b>              | Perform Testing at various levels and produce an efficient system.   | PO3, PO6      |

| <b>UNIT I</b>           | Evolution of Big data — Best Practices for Big data Analytics — Big data characteristics — Validating — The Promotion of the Value of Big Data — Big Data Use Cases- Characteristics of Big Data Applications — Perception and Quantification of Value - Understanding Big Data Storage — A General Overview of High-Performance Architecture — HDFS — Map Reduce and YARN — Map Reduce Programming Model                             |          |   |   |   |   |         |             |       | 12                  |       |
| <b>UNIT II</b>          | Advanced Analytical Theory and Methods: Overview of Clustering — K-means — Use Cases — Overview of the Method — Determining the Number of Clusters — Diagnostics — Reasons to Choose and Cautions .- Classification: Decision Trees — Overview of a Decision Tree — The General Algorithm — Decision Tree Algorithms — Evaluating a Decision Tree — Decision Trees in R — Naïve Bayes — Bayes Theorem — Naïve Bayes Classifier.       |          |   |   |   |   |         |             |       | 12                  |       |
| <b>UNIT III</b>         | Advanced Analytical Theory and Methods: Association Rules — Overview — Apriori Algorithm — Evaluation of Candidate Rules — Applications of Association Rules — Finding Association & finding similarity — Recommendation System: Collaborative Recommendation- Content Based Recommendation — Knowledge Based Recommendation- Hybrid Recommendation Approaches.   |          |   |   |   |   |         |             |       | 12                  |       |
| <b>UNIT IV</b>          | Introduction to Streams Concepts — Stream Data Model and Architecture — Stream Computing, Sampling Data in a Stream — Filtering Streams — Counting Distinct Elements in a Stream — Estimating moments — Counting oneness in a Window — Decaying Window — Real time Analytics Platform(RTAP) applications — Case Studies — Real Time Sentiment Analysis, Stock Market Predictions. Using Graph Analytics for Big Data: Graph Analytics |          |   |   |   |   |         |             |       | 12                  |       |
| <b>UNIT V</b>           | NoSQL Databases : Schema-less Models : Increasing Flexibility for Data Manipulation-Key Value Stores- Document Stores — Tabular Stores — Object Data Stores — Graph Databases Hive — Sharding — Hbase — Analyzing big data with twitter — Big data for E-Commerce Big data for blogs — Review of Basic Data Analytic Methods using R.   |          |   |   |   |   |         |             |       | 12                  |       |
| <b>Total</b>            |   |          |   |   |   |   |         |             |       | <b>60</b>           |       |
| <b>Course Outcomes</b>  |   |          |   |   |   |   |         |             |       | <b>Programme</b>    |       |

|                        |   | Outcomes      |
|------------------------|---|---------------|
| CO                     | On completion of this course, students will   |               |
| CO1                    | Work with big data tools and its analysis techniques.   | PO1           |
| CO2                    | Analyze data by utilizing clustering and classification algorithms.   | PO1, PO2      |
| CO3                    | Learn and apply different mining algorithms and recommendation systems for large volumes of data.   | PO4, PO5      |
| CO4                    | Perform analytics on data streams.  | PO3, PO5, PO6 |
| CO5                    | Learn NoSQL databases and management.   | PO3, PO4      |
| <b>Text Book</b>       |   |               |

| UNIT I                     | <b>Basics of Python Programming:</b> History of Python-Features of Python-Literal-Constants-Variables - Identifiers–Keywords-Built-in Data Types-Output Statements – Input Statements-Comments – Indentation- Operators-Expressions-Type conversions. <b>Python Arrays:</b> Defining and Processing Arrays – Array methods.   |           |   |   |   |   |         |                           |           | <b>15</b>           |
| UNIT II                    | <b>Control Statements:</b> Selection/Conditional Branching statements: if, if-else, nested if and if-elif-else statements. Iterative Statements: while loop, for loop, else suite in loop and nested loops. <b>Jump Statements:</b> break, continue and pass statements.  |           |   |   |   |   |         |                           |           | <b>15</b>           |
| UNIT III                   | <b>Functions:</b> Function Definition – Function Call – Variable Scope and its Lifetime-Return Statement. <b>Function Arguments:</b> Required Arguments, Keyword Arguments, Default Arguments and Variable Length Arguments- Recursion. <b>Python Strings:</b> String operations- Immutable Strings - Built-in String Methods and Functions - String Comparison. <b>Modules:</b> import statement- The Python module – dir() function – Modules and Namespace – Defining our own modules. |           |   |   |   |   |         |                           |           | <b>15</b>           |
| UNIT IV                    | <b>Lists:</b> Creating a list -Access values in List-Updating values in Lists-Nested lists -Basic list operations-List Methods. <b>Tuples:</b> Creating, Accessing, Updating and Deleting Elements in a tuple – Nested tuples– Difference between lists and tuples. <b>Dictionaries:</b> Creating, Accessing, Updating and Deleting Elements in a Dictionary – Dictionary Functions and Methods - Difference between Lists and Dictionaries.  |           |   |   |   |   |         |                           |           | <b>15</b>           |
| UNIT V                     | <b>Python File Handling:</b> Types of files in Python - Opening and Closing files-Reading and Writing files: write() and writelines() methods- append() method – read() and readlines() methods – with keyword – Splitting words – File methods - File Positions-Renaming and deleting files.   |           |   |   |   |   |         |                           |           | <b>15</b>           |
| <b>TOTAL HOURS</b>         |   |           |   |   |   |   |         |                           | <b>75</b> |                     |
| <b>Course Outcomes</b>     |   |           |   |   |   |   |         | <b>Programme Outcomes</b> |           |                     |
| CO                         | On completion of this course, students will   |           |   |   |   |   |         |                           |           |                     |
| CO1                        | Learn the basics of python, Do simple programs on python,   |           |   |   |   |   |         | PO1, PO2, PO3,            |           |                     |

|                        |  |                              |
|------------------------|--|------------------------------|
|                        | Learn how to use an array.   | PO4, PO5, PO6                |
| CO2                    | Develop program using selection statement, Work with Looping and jump statements, Do programs on Loops and jump statements.  | PO1, PO2, PO3, PO4, PO5, PO6 |
| CO3                    | Concept of function, function arguments, Implementing the concept strings in various application, Significance of Modules, Work with functions, Strings and modules. | PO1, PO2, PO3, PO4, PO5, PO6 |
| CO4                    | Work with List, tuples and dictionary, Write program using list, tuples and dictionary.  | PO1, PO2, PO3, PO4, PO5, PO6 |
| CO5                    | Usage of File handlings in python, Concept of reading and writing files, Do programs using files.  | PO1, PO2, PO3, PO4, PO5, PO6 |

| UNIT I                     | <b>Introduction:</b> Laptop computing – Wireless Technologies – Mobility and Portability – Overview of IP and Routing – Mobile networking – Example Architectures – The role of IETF in mobile networking.   |          |   |   |   |   |         |                              |           | <b>15</b>           |
| UNIT II                    | <b>Cellular communication concepts:</b> Wireless transmission – Multiplexing – Modulation – Spread Spectrum – Cellular system – GSM architecture – protocols – handover procedure – security.  |          |   |   |   |   |         |                              |           | <b>15</b>           |
| UNIT III                   | <b>Advertisement and registration :</b> Agent solicitation and Discovery Mechanism – Router Discovery Protocol – Agent advertisement – Agent operation – Agent discovery – registration overview – Authentication overview – Registration request, reply and extensions – Mobile node registration procedures – Foreign agent registration actions – Home agent Processing |          |   |   |   |   |         |                              |           | <b>15</b>           |
| UNIT IV                    | <b>Data grams and route optimizations :</b> Tunneling overview and terminology– Encapsulation – Routing failures – Tunnel management – Decapsulation – Unicast broadcast and multicast data gram routing – Mobile routers – Route optimization – Message format – Extensions – Mobile key requests.  |          |   |   |   |   |         |                              |           | <b>15</b>           |
| UNIT V                     | <b>IP versions and DHCP :</b> Mobility support in IP version 6 – smooth hand off – Renumbering – DHCP – WAP protocol.<br><b>Security and motivation detection:</b> Ingress filtering – Reverse tunneling – Broadcast preference extensions – Movement detection – Localizing registrations.  |          |   |   |   |   |         |                              |           | <b>15</b>           |
| <b>TOTAL HOURS</b>         |  |          |   |   |   |   |         |                              | <b>75</b> |                     |
| <b>Course Outcomes</b>     |  |          |   |   |   |   |         | <b>Programme Outcomes</b>    |           |                     |
| CO                         | On completion of this course, students will  |          |   |   |   |   |         |                              |           |                     |
