

DEPARTMENT OF BIOCHEMISTRY

Department Profile:

Biochemistry focus on how living beings function on a Molecular level. There are a wide range of scientific disciplines that you can pursue as careers, such as medicine, microbiology, genetics, plant sciences and forensics. The Department of Biochemistry is a diverse group of scientists, trainees, and staff dedicated to discovering the basic mechanisms of biological processes through fundamental research and disseminating that knowledge via education.

The Department of Biochemistry was established in the year 1997 with dedicated staffs to empower student's knowledge and committed to train next generation students through best curriculum, intense training by conducting seminars and research practices. The department produces number of University rank holders every year. The department organized many International, national seminars and Conferences. The department has qualified staff members with well equipped laboratories and well stocked library.
